

AMENDMENT

Please amend the above-identified application as follows:

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A method for creating a user metric pattern, the method comprising:

receiving, within a network, a plurality of disparate user metrics from a metric sensor worn by the user; wherein the user metrics represent indications of user conditions, wherein the user condition is selected from the group consisting of:

body temperature, blood pressure, heart rate, and galvanic skin response;

saving the plurality of disparate user metrics;

editing the subset of the saved disparate user metrics including receiving an editing instruction from a user identifying a user metric and deleting the user metric identified in the editing instruction;

identifying a subset of the saved disparate user metrics that comprise a user metric pattern comprising mining the saved disparate user metrics, wherein a user metric pattern is comprised of a plurality of predetermined generic metrics not created specifically for the user and determined to comprise a metric pattern representing a metric state common to many users;

storing the subset of the saved disparate user metrics as a user metric pattern,
further comprising:

creating a metric list; and

associating the metric list with a user metric pattern data structure;

associating an action with the metric pattern comprising retrieving an action ID
from an action database, wherein the action is designed to administer devices to
affect the user metric state defined by the metric pattern.
